Web request body inspection - new

Edit

The body inspection size limit is the maximum request body size that AWS WAF can inspect. For Application Load Balancer and AppSync, the limit is currently fixed at 8 KB.

For other resources, the default limit is currently 16 KB, and you can increase the limit for additional costs.

[AWS WAF Pricing](#) 

Body size limit

The AWS WAF default limit is 16 KB. Settings over 16 KB incur additional costs. [Learn more](#)

Data filters

The traffic overview dashboard gives you an overview of the traffic trends inspected by AWS WAF. For more information on the traffic overview dashboard, see the [AWS WAF Developer Guide](#). The traffic overview dashboard incurs costs based on CloudWatch metrics. For more information on query costs, see [CloudWatch pricing](#).

Last 1 hour

Local time

Traffic type

All traffic

Terminating rule actions

Blocked

Allowed

Action totals for the specified time range - All traffic

Request counts for all traffic during the specified time range. This shows counts for all possible terminating actions, while the rest of the dashboard shows only the actions that you've selected in the filters. If you're filtering on a relative time range, each action also shows the percentage change from the prior, equivalent-length time range. For example, if you've chosen 1 day as the time range, the percentage change reflects the difference between 48-24 hours ago and 24-0 hours ago.

Total	Blocked	Allowed	Captcha	Challenge
453	150	303	0	0

Action summary for the specified time range - All traffic

This shows the actions that you've selected in the filters. If you're filtering on a relative time range, each action shows the total traffic based on a the selected action and top rules.

Action totals

Request counts for each selected terminating action. [View in CloudWatch](#)

Web ACL capacity units (WCUs) used by your web ACL

The WCUs used by the web ACL will be less than or equal to the sum of the capacities for all of the rules in the web ACL.

The total WCUs for a web ACL can't exceed 5000. Using over 1500 WCUs affects your costs. [AWS WAF Pricing](#)

702/5000 WCUs

Default web ACL action for requests that don't match any rules
